Yefan Zhi is a second-year Ph.D. student in *Architecture* at the *University of Pennsylvania*. His research optimizes the energy and material efficiency of architectural structures from design-for-manufacturing perspectives. His work extensively exploits computational geometry and graph algorithms for automating fabrication rationalization and enabling fabrication-oriented design. Yefan is a member of the *Polyhedral Structures Laboratory (PSL)* concentrating on advancing structural and architectural geometry and construction technologies.

Yefan is a certified forklift driver and run *marathons*.
